Human Spirometry: Breathing Parameters at Rest and After Exercise

Saket Choudhary

February 14, 2017

BISC 104 Session 11

Terminology

- Tidal Volume: Amount of air that moves in or out during one cycle
- Inspiratory Reserve Volume: Additional air that can be breathed in
- Residual Volume: Volume of air left after breathing out completely

Experiment

- Please read the lab manual!
- Exercise 1 and 2: Estimate parameters before and after exercise

Office Hours

Tuesday: 9-10AM Thursday: 9-10AM ZHS 372
